WORK EXPERIENCE

Capgemini

Barcelona, Spain

SENIOR SOFTWARE ENGINEER

2024 – Present

Delivered the Private Banking & Business platform for Santander Bank, focusing on Angular front-end development, reusable UI components, and maintainable integration with backend services.

Crealogix

Barcelona, Spain

SENIOR WEB DEVELOPER

2024 – 2024

Contributed to the Saudi National Bank Mobile App and SNB Quick-Pay, supporting core banking journeys, stability improvements, and cross-platform delivery for Android and iOS.

NTTData

Barcelona, Spain

SENIOR WEB DEVELOPER

2018 – 2023

Worked across CORDIS for the European Commission, the Galatea Design System for Banco Sabadell, and the Zurich Design System for Zurich Insurance, driving Angular front-end delivery, design-system reuse, and release support.

Teravision

Caracas, Venezuela

MID-LEVEL WEB DEVELOPER

2017 – 2018

Delivered commercial web pages for a range of clients, translating brand requirements into responsive front-end implementations and supporting iterative delivery.

Synergy-GB

Caracas, Venezuela

JUNIOR / MID-LEVEL WEB DEVELOPER

2014 – 2017

Contributed to Banca+ white-label banking implementations, focusing on configurable UI architecture, backend integration reuse, and release support across client deployments.

EDUCATION

Simon Bolivar University

Caracas, Venezuela

B.SC. IN COMPUTER SCIENCE

PROFILE

Senior frontend and web developer with 10+ years of experience delivering banking platforms, mobile apps, and design systems across regulated and enterprise environments. Strong in Angular and Ionic ecosystems, with a focus on code quality, maintainability, accessibility, and reusable UI architecture. Experienced in leading teams, mentoring developers, and driving technical direction for front-end projects. Passionate about web standards, performance optimization, and creating seamless user experiences.

SKILLS

FRAMEWORKS

Angular	
Ionic	
LitElement	
StencilJS	
AngularJS	
Angular Native Federation (Microfrontends)	
React / Next.js	
Node.js / Express	
Vue / Nuxt	
Spring Boot (Java)	

PROGRAMMING LANGUAGES

TypeScript	
JavaScript (ESNext)	
HTML / CSS / Sass	
SQL / PLSQL	

Focus on software engineering, web technologies, and human-computer interaction with a strong emphasis on product-oriented development.

SELECTED PROJECTS

PRIVATE BANKING & BUSINESS (PBB) Angular 16-20, Reactive Forms, Karma/Jasmine

Internal banking platform delivered at Capgemini for Santander Bank. Built app and component library from scratch, upgraded Angular 16 to 20, and aligned the front end with Java Spring Boot microservices using DDD patterns, Native Federation readiness, and CI/CD with GitHub Actions.

SAUDI NATIONAL BANK APP (SNB) Ionic, Angular 16/17, RxJS, Reactive Forms

Large-scale banking app at Crealogix for Saudi National Bank across Android and iOS. Owned maintenance and quality improvements for core journeys (transactions, loans, payments) and supported the SNB QuickPay companion app with stability-focused fixes and refactors.

ZURICH DESIGN SYSTEM Angular, StencilJS, Storybook

Design system initiative delivered at NTT Data for Zurich Insurance. Built the design system from scratch, establishing reusable components and shared documentation standards to improve consistency and front-end delivery speed.

GALATEA DESIGN SYSTEM Angular, StencilJS, Storybook, Microfrontends

Design system and front-end platform delivered at NTT Data for Banco Sabadell. Served as technical lead during first release support, delivered core web components, and implemented the first microfrontend to define the rollout integration pattern.

CORDIS Angular, Team Leadership

European Commission research results portal delivered at NTT Data. Led the Angular front-end team, setting technical direction, enforcing code quality, and unblocking delivery across feature releases.

BANCA+ Ionic, AngularJS

White-label digital banking product at Synergy-GB for bank-specific deployments. Contributed to configurable architecture for branding, feature tailoring, backend integration reuse, and CI/CD delivery pipelines with Jenkins across multiple banking implementations.

Feature-Driven Development (FDD)	

RESPONSIBILITIES AND ACHIEVEMENTS

Implemented front-end solutions across 6 major initiatives in banking, insurance, and public-sector platforms, delivering reusable patterns that improved maintainability and consistency.

Built reusable UI components and design-system foundations for Zurich and Galatea, accelerating feature implementation and reducing duplicated front-end effort.

Improved code quality in Angular and Ionic codebases through automated testing workflows, focused code reviews, and consistent linting and formatting practices.

Delivered accessible, responsive user journeys in collaboration with product, UX, and backend teams, including high-impact banking flows for transactions, loans, and payments.

Executed modernization work including Angular 16 to 21 upgrades, CI/CD alignment with GitHub Actions, and microfrontend readiness to reduce upgrade risk and improve release reliability.
