

David Prieto

Senior Frontend & Web Developer

Barcelona, Spain | +34 684 15 39 06 | dprietotramites@gmail.com | github.com/mergin

PROFILE

Frontend-focused senior web developer with 10+ years of experience building accessible, performant digital products in Angular, React, Next.js, Ionic, and TypeScript. Strong background in design systems, microfrontends, testing, and close collaboration with product and design teams.

CORE SKILLS

Frontend: Angular, React, Next.js, Ionic, TypeScript, JavaScript, HTML, CSS, Sass, StencilJS, LitElement, Vue, Nuxt

Architecture: Design systems, microfrontends, Domain-Driven Design, Feature-Driven Development, reusable component libraries

Testing: Storybook, Vitest, Karma, Jasmine, Jest, Testing Library

Tools: Git, GitHub, ESLint, Prettier, Docker, CI/CD pipelines, Swagger / OpenAPI, Postman

Backend and APIs: Node.js, Express, Spring Boot, REST, JSON, JWT, SQL

WORK EXPERIENCE

BrightPixel Studio — Senior Frontend Developer

2022 – Present

Led migration of a marketing platform to Next.js and TypeScript, improving Core Web Vitals and reducing page-load time by 38%. Built a reusable component library and a Storybook workflow that shortened UI delivery cycles across product squads.

Nova Commerce — Web Developer

2019 – 2022

Developed responsive e-commerce features with React, Redux, and Node.js for multi-market storefronts. Integrated analytics, payment, and CMS APIs while maintaining performance and code quality standards.

Blue Leaf Digital — Frontend Developer

2017 – 2019

Delivered custom brand websites and campaign microsites with a focus on pixel-perfect execution. Collaborated with UX teams to translate visual concepts into scalable interfaces using modular Sass and JavaScript.

SELECTED PROJECTS

Private Banking & Business (PBB) — Angular 16-20, Reactive Forms, Karma/Jasmine

Built app and component library from scratch, upgraded Angular 16 to 20, and aligned the front end with Java Spring Boot microservices using DDD patterns, Native Federation readiness, and CI/CD with GitHub Actions.

Saudi National Bank Mobile App (SNB) — Ionic, Angular 16/17, RxJS, Reactive Forms

Owned maintenance and quality improvements for core journeys including transactions, loans, and payments. Supported the SNB QuickPay companion app with stability-focused fixes and refactors.

Zurich Design System — Angular, StencilJS, Storybook

Built the design system from scratch, establishing reusable components and shared documentation standards to improve consistency and front-end delivery speed.

Galatea Design System — Angular, StencilJS, Storybook, Microfrontends

Served as technical lead during first release support, delivered core web components, and implemented the first microfrontend to define the rollout integration pattern.

RESPONSIBILITIES AND ACHIEVEMENTS

Front-end implementation: Implemented front-end solutions across 6 major initiatives in banking, insurance, and public-sector platforms, delivering reusable patterns that improved maintainability and consistency.

Reusable UI systems: Built reusable UI components and design-system foundations for Zurich and Galatea, accelerating feature implementation and reducing duplicated front-end effort.

Code quality: Improved Angular and Ionic codebases through automated testing workflows, focused code reviews, and consistent linting and formatting practices.

Product delivery: Delivered accessible, responsive user journeys in collaboration with product, UX, and backend teams, including high-impact banking flows for transactions, loans, and payments.

Modernization: Executed modernization work including Angular 16 to 21 upgrades, CI/CD alignment with GitHub Actions, and microfrontend readiness to reduce upgrade risk and improve release reliability.

EDUCATION

B.Sc. in Computer Science, Simon Bolivar University

Focus on software engineering, web technologies, and human-computer interaction with a strong emphasis on product-oriented development.
